Subject: Rough Draft Area 2 SRI comments (1 of 2)

Jim,

Attached are MDEQ draft comments. These are still very raw, and we will continue to refine, but we wanted to let you see the direction we are heading. Our plan is to front load the comment letter with additional analysis and figures we are interested in. We borrowed the format from the Sediment Guidance doc. We have also provided some example attachments to more clearly illustrate the info desired (a couple will be coming in follow up email due to size).

Give me a call if you have questions, I trust we will be getting the full team on a call in the near future to re-engage on the SRI.

Paul
